SQLi & MySQLi Assignments

Week 11, Module 3-4: be ready for the next class of October 30, 31

I assume that you familiar with simple SQL and MySQL. You watched 33 videos and read Chapters 4-7

I assumed that you watched videos covering Using PHP with MySQL: https://www.thenewboston.com/videos.php?cat=87

✅ 100 points in the class: Demonstrate MySQL Connection: Many of you did it in the class, but I did not recorded grade. If your connection still not working, use database user name and database password, as shown in video. Complete connection without any controls in the form at first. Make sure that you see message "Connection Successful" That would be your first grade

✅ 100 points in the class: Database updated from the form on the server. Remember, you have to have Database at first with same fields as in the form.

We will start working with MySQLI Connection (Video 3: Connections **3 - Connecting** 8 min). You can try it at home to be prepared

At home: Please read Chapter 9 from text book

In the class we are going to fill Database table from web form

Be ready to find needed info in Tutorial: http://www.hosting.vt.edu/tutorials/phpmysql/

Do not be late for class. I will give to you pop quiz at the beginning of the class (15 minutes only). Nothing extra needed to prepare for the quiz – only knowledge you

As you might see there is nothing to submit, but there is a lot of reading and video watching before class.

http://uh-cis.clarify-it.com/d/3gywza. Reading my lecture ahead will prepare you for the class

Create new MYSQLI button in navigation strip. I will grade that in the next Homework. Place my Lecture 11 to instructor source
